Patents

Method for optimising the placement of at least two pieces of information. The patent has been registered in Sweden, Europe and USA.

Pedro Milburn

Lead Software Engineer, .NET, AI, C#, Python
Montevideo, Montevideo, Uruguay

Summary

In shortI am seeking a Software Development or Technical People Leadership role closely connected to the technical side of the organization. After 25 years in the software industry, building new products and features and solving complex technical challenges, I enjoy combining people leadership and mentoring with hands-on involvement in technical solutions.I am particularly interested in organizations with well-established processes, strong engineering practices, an inclusive culture, and a collaborative team environment, where people feel empowered to contribute and make an impact. I thrive in multicultural, global environments where English is the primary working language, ideally within the US/LATAM time zones.Technical ExpertiseI have extensive experience with C#, .NET, Python, Microsoft Power Platform, GCP, and Azure. More recently, I have been working with AI agents, Microsoft Copilot, and AI-driven software development lifecycle (SDLC) practices.I am a Microsoft-certified developer and Power Platform specialist, with a strong focus on delivering reliable, maintainable, and scalable solutions through automation, engineering best practices, and continuous improvement.Throughout my career, I have worked on complex projects from design through delivery. I was also a contributor to a patent at Admeta in the online marketing industry, with technology that was used by major companies including Google, Amazon, and Microsoft.Leadership & CollaborationI am a highly collaborative and people-oriented professional who enjoys teamwork, mentoring, problem solving, and delivering complex projects. I particularly enjoy helping people grow, creating an environment where teams can perform at their best, and empowering individuals to take ownership and contribute their strengths.I value a hybrid working model, as it provides a good balance between collaborating and building relationships with colleagues in the office while also allowing time to focus and spend time with family and nature.Having lived approximately half of my life in Europe and Uruguay, I bring a multicultural perspective and am comfortable working across different cultures, locations, and time zones.

Experience

Aven Hospitality
Lead Software Engineer
January 2026 - July 2026 (7 months)
Montevideo, Uruguay

My role involve develop new features in .NET for the hotel Industry. Upgraded core systems from .Net framework to the .newest .Net,. Migrated services and libraries from on premise to Google Cloud GCP. Design new components for the a long term strategy. Problem solving in production in GCP machines and redeployment. Working daily with QA to get unit tests, automation tests and performance. Solve issues regarding devops, updating libraries, changing jobs configurations in Jenkins and writing scripts. Owner of VeraCode and SonarCube code fixes with the team. Investigate and create context and orchestration for new solutions powered by AI.

Currently, I serve as the technical lead for a team of eight, consisting of both QA engineers and developers.

Environment: GCP, virtual machines, PubSub, CodeNova, Copilot, Gemini, Visual Studio and Visual Studio Code, Oracle, nHibernate, Jenkins, Rally, SailPoint, Swagger, Splunk, Graphana, Veracode, SonarCube, Cloud Run, Terraform, C#, Power Shell Scripts, ApiGee, performance, automation testing and SynXis Booking Engine.

Sabre Corporation
Manager and Development Team Lead
October 2023 - February 2026 (2 years 5 months)
Montevideo, Uruguay

My role involves a mixture of people management and software development for Sabre Hosteling Services.

Worked as manager of a team of 8 developers and in a daily basis I meet with other managers in the organization to schedule releases, troubleshoot the product, directing innovation and new technologies to develop the smartest solutions for the travel industry. 1 to 1 meetings, set developer grow plan, communicate new stategies to align the team to new goals, empowered team capacity, give feedback and be act as a facilitator for blockers. At some point some scrum master covering was done and solving unclear requirements of

tasks and defects. Assignment of user stories and defects to the ideal person and performance evaluation and assign performance bonuses.

Rest/Soap services and development of the Sabre platform and the core business logic with the latest technology. I Improve development processes and take care of trainings, velocity improvements, and managing a software development team with Sr .NET developers. Besides, I solve complex technical issues and assign tasks to developers. Create long term plans and get in the depth of performance and quality topics. Promote innovation and mentoring developers in highly motivated teams.

Environment: Azure Services with VMs, App Services, Kubernetes Services, Azure Service, Azure Functions and Azure Logic Apps deployed with Azure DevOps.

Globant

Power Platform Architect and .NET Developer
September 2018 - September 2023 (5 years 1 month)
Montevideo

Matter expert and architect in the Microsoft Power Platform. SharePoint and .NET expert and assistant in software development in several projects for a big company in USA and UK. This work involves creating new development environments, technical architecture of new solutions and deployment of new solutions in both .NET and SharePoint. To update my knowledge, I have recently earned the Microsoft certification in Power Platform fundamentals. Added to this, working as Azure Devop Services ande Cloud Services.
I have worked in .NET developing a plugin with AI, Visual Studio Code and C# and cutting edge technologies with the internal product Augmented Coding.

MVD Technologies

Microsoft Architect and SharePoint Developer
August 2017 - August 2018 (1 year 1 month)
Montevideo, Uruguay

Developed new features in their products MVD Quality and MVD Comply built on SharePoint 2013. MVD Quality make companies life easier to adapt to the new ISO rules. MVD Comply is a framework that helps managing flags and alert for each employee personalized profile and it's easy to adapt to new rules in the environment like for example new Government requirements. This product has farm and sandbox solutions and an advanced client-side scripting. Currently we are adapting some modules to be compatible with SharePoint

Online. Currently, we are working with countries like Peru, Argentina, Chile and Uruguay.
New installations in SharePoint 2013, development of new features and web development both server side in C# and client side Javascript frameworks and JQuery. A lot of the code has been rebuilt in complex Javascript code that can run in SharePoint Online and Azure. The company has their own SharePoint tools that are offered to licensed clients make their lives easier. Besides there is a lot of older code built in C# working in Visual Studio 2015 that has to be maintained and improved. Added to this, I have worked a lot with the SharePoint using its Rest Services and built in controls that are useful for many clients. The daily work also included full stack developing customizing Html Forms, adding Javascript, CSS and adapt the system to more than 100 clients.

(Own company)
Solution architect and SharePoint Developer
February 2017 - August 2017 (7 months)
Montevideo

Developed a new Intranet for an American Oil company called Lindsayca in SharePoint Online. Developed mainly in Jsom and Nintex Online Workflows. Some work with requirements and overall design. Created a responsive master page in SharePoint Online.

Developed bugfixes for other companies mainly in SharePoint 2013 and 2010 on premises.

Urudata Software
.NET Developer
September 2016 - December 2016 (4 months)
Montevideo

Developed a new system in .NET MVC 5 and SQL Server 2012 for a Brazilian bank called Itaú. We created a system to follow up and track the states of all new digitalized client documents in 20 agencies. Most of the work was done in C# in a Web application with a heavy front end in Html5, JQuery and Angular 1.0. Urudata's own products Q-Flow and Intellikom were integrated to provide a more robust functionality.

Grupo Pragma Consultores
